OBJECTIVE

Software Engineer skilled in React.js, React Native, Node.js, MySQL, MongoDB, and REST APIs. Focused on building scalable, high-performance web and mobile applications and delivering clean, maintainable code in collaborative environments.

WORK EXPERIENCE

•Software Engineer at GlocalView Infotech

April 2024 - Present

- Developed RESTful APIs with Node.js and Express, enabling seamless communication between frontend and backend systems, resulting in improved data retrieval efficiency.
- Designed and implemented scalable, responsive web applications using React.js and Vite.js, ensuring optimal user experience.
- Worked on frontend development and API integration, improving UI responsiveness and ensuring smooth interaction between client-side and server-side components..
- Optimized database performance by writing efficient SQL queries and managing MySQL/MongoDB databases.
- Used Jira for sprint planning, task tracking, and bug management in an Agile development environment.
- Integrated Sentry for real-time error tracking, crash monitoring, and performance diagnostics in production applications.

TECHNICAL SKILLS

Languages:HTML, CSS, JavaScript, TypeScript, SQL

Frameworks:React JS,Expo, React-Native, Vue.js, Node.js, Sequelize, Express, Vite, Tailwind

CSS, GraphQL

Development Tools: VSCode,Docker, MySQL Workbench, NPM, Git, GitHub, Gitlab, AWS, Azure, Jira

Monitoring & Debugging: Sentry

Libraries: Material UI, Redux, Bootstrap, Firebase, PrimeReact

Database: MySQL, MongoDB

EDUCATION

•Bachelor of Computer Applications (BCA)

2019-22

Chaudhary Charan Singh University Meerut

•Master of Computer Applications (MCA)

2022-2024

Dr. A. P. J. Abdul Kalam Technical University Meerut

TECHNICAL SOLUTIONS DELIVERED

Web Development

•Human Resource Management System (HRMS)

Enterprise-scale HR platform managing end-to-end employee lifecycle and operations.

- **Technology Used:** React.js, Vite, Redux Toolkit, Tailwind CSS, Express.js, MySQL, REST APIs, Docker
- Managed 1K+ employees with attendance, payroll, leave, policies, and reporting modules.
- Implemented JWT authentication, OTP-based password reset, Formik + Yup validation, and role-based access control (RBAC).
- Built dynamic dashboards and reusable UI components, improving load performance by 30%.
- Enabled real-time notifications, file import/export, and multi-environment deployment.
- Automated HR reporting and audit logs, reducing manual effort by 40%.

•Cuppanord

E-commerce platform for coffee sales with CRM, loyalty program, and inventory management.

- **Technology Used:** React.js, Node.js, Express.js, SQL, Tailwind CSS, Docker, REST APIs
- Developed CRM for customer management, order history, and engagement tracking.
- Implemented inventory tracking with low-stock alerts and product variants, reducing stock-outs by 25%.
- Created admin dashboards for sales analytics, customer insights, and inventory monitoring.
- Integrated payment gateway with seamless checkout and automated invoices.
- Implemented automated email notifications and promotional campaigns, boosting customer retention by 15%.

- Developed backend API modules for reporting, analytics, and order management.

•GlocalTjenester

Norway-based service marketplace connecting customers with local service providers.

- **Technology Used: React JS, Node.js, Express.js, SQL, REST APIs, Docker**
- Built service listings, vendor registration, and detailed service profile management.
- Implemented search and filtering by category, skill, and location, including reviews and pricing.
- Enabled B2B marketplace features for suppliers and business buyers.
- Designed scalable architecture similar to TaskRabbit / Thumbtack with microservice readiness.
- Optimized database queries and caching, improving search performance by 40%.

•Skinverge

Skincare platform offering product sales, clinical service booking, and AI-based skin analysis.

- **Technology Used: React.js, Node.js, Express.js, Sequelize, MySQL, Tailwind CSS, Firebase, Docker, REST APIs**
- Built dashboards for clinics, therapists, and vendors with role-based access.
- Integrated AI-powered skin analysis recommending treatments and products.
- Implemented appointment booking, notifications, and cron-based scheduling.
- Designed modular UI components for seamless product browsing and checkout.

•Estimate My App

Web app for estimating software project costs and timelines with feature-based calculations.

- **Technology Used: React.js, Vite, REST APIs**
- Built modular UI components and interactive forms for real-time estimates.
- Integrated APIs to calculate costs and timelines based on selected project features.
- Enhanced UX with dynamic charts and feature comparison for faster decision-making.

•VisitorBuk

Web-based visitor management and subscription platform with automated payments and reporting.

- **Technology Used: React JS, Node.js, Express.js, Sequelize, MySQL, Tailwind CSS, Stripe, Razorpay**
- Developed role-based dashboards for Super Admin and Company Admin users.
- Integrated Stripe and Razorpay payment gateways with automated subscription renewals.
- Implemented cron jobs for visitor log cleanup and reporting.
- Added visitor analytics and reporting dashboards for management insights.

•Learning Management System (LMS)

Web platform for managing courses, learners, instructors, and assessments with AI-powered recommendations.

- **Technology Used: React.js, Node.js, Express.js, MySQL, Sequelize, Tailwind CSS, OpenAI APIs**
- Implemented role-based access control and analytics dashboards for learner progress tracking.
- Integrated AI-powered content recommendation system for personalized learning paths.
- Optimized performance for concurrent users and integrated reporting for instructors.

Mobile Application Development

•Wedding Asia World App

Cross-platform wedding services mobile application with admin backend.

- **Technology Used: React Native, REST APIs, Sentry.js**
- Deployed on iOS and Android stores with real-time crash monitoring.
- Implemented vendor offers, QR code scanning, and deep linking for promotions.
- Developed backend and admin modules for managing vendors, users, and analytics.
- Optimized UI for performance and cross-device compatibility.

•Skinverge Mobile App

Mobile app companion for Skinverge platform.

- **Technology Used: React Native, REST APIs, Firebase, Sentry.js**
- Enabled product browsing, appointment booking, and personalized recommendations.
- Integrated push notifications and seamless clinic/service discovery.
- Improved offline handling and caching for faster load times.

•Cuppanord Mobile App

Mobile commerce app for coffee sales with CRM integration.

- **Technology Used: React Native, REST APIs, Docker**
- Implemented product browsing, order placement, and real-time order tracking.
- Synced inventory and order data with backend systems.
- Enhanced UI for smooth checkout and loyalty program integration.

•GlocalJnester Mobile App

Mobile app for GlocalTjenester platform (Norway).

- **Technology Used: React Native, REST APIs, Docker**
- Users can find local workers quickly, post service requests, and browse by skill/location.
- Integrated multilingual support, reviews, and pricing visibility.
- Added in-app chat and request tracking for enhanced user experience.
